

## GUARDX

SUPERVISION AND MANAGEMENT SOFTWARE FOR INTEGRA AND INTEGRA Plus  
ALARM CONTROL PANELS

Your advanced virtual operator

# Discover GUARDX

Effective supervision of signals sent from alarm control panels guarantees security of the protected premises. With the GUARDX software, you can access in real time the detailed status of the connected alarm systems, and identify any source of possible alarms.

With **GUARDX**, you can visualize the status of the **INTEGRA** and **INTEGRA Plus** intruder alarm systems.

## Maps

Use the map mode to **visualize the status of partitions** (alarms, arming or sabotages) in real time. When granted a high-enough level of permissions, GUARDX operators can directly interact with the system using the maps, for example, by arming or disarming the alarm system in a specific area.

## Pop-up alerts

Any dangerous situation that requires an intervention won't go unnoticed. GUARDX employs **pop-up alerts** combined with a notification sound to guarantee that operators supervising the intruder alarm system don't miss them.

## Event log

To complement the map mode, GUARDX features the **event log** that records all events detected by the system, thus providing operators with necessary information.

## Remote management and control

With GUARDX, you can easily **manage system users**: add or delete accounts, grant and review user permissions, and assign proximity cards. Additionally, with the **virtual keypad**, GUARDX operators have **access to all functions of the alarm control panel**.

	Username	User type	Password	Partitions	Keypad / reader	Permissions	Proximity card
	Anne Smith	regular	****	1-5	21,33-34	1-7, 12	
	Richard Jones	regular					
	Julia Perry	regular

- 38: CA-64 DR (26h)

## Remote security

Distance does not matter when you use GUARDX. Even with the supervising monitoring center located far away, GUARDX can still effectively monitor any protected premises when **remotely connected to the alarm control panels**. Simply establish a connection using a modem or Ethernet.

## 30 YEARS OF EXPERIENCE

Professional protection of each type of premises, as well as people staying therein, through advanced, yet functional and cost-effective solutions – these few words may serve as the shortest description of the mission of SATEL, a manufacturer of security systems with involvement of 100% Polish capital. Due to integrity in business and a special emphasis on high quality and a wide range of products offered, the SATEL brand has been highly appreciated in the industry for 30 years.

This philosophy of management and hard work of more than 350 SATEL's employees produce tangible results. The wide range of over 400 offered products provides countless opportunities to create security, home automation, fire alarm, access control and monitoring systems, tailored to the individual needs of each user. At the same time, these systems meet all requirements prescribed by Polish and international regulations and industry standards.

Bringing the functionality of devices into line with current requirements and expectations of the market with the use of the latest technologies is one of the main objectives of SATEL. For this reason the design and production departments of the Company are continuously being modernized and expanded. A natural consequence of all actions aimed at the production of top-quality devices was the introduction of the quality management system conforming to ISO 9001 in 2002. Regardless of this certification, SATEL also carries out a full functional test of all products leaving the production line, thus ensuring reliability of the manufactured devices. Focusing on modern design and attaching importance to the highest levels of quality and functionality of its products, SATEL has gained many satisfied customers not only in Poland but also in more than 50 markets worldwide.
