Smart HUB Plus LV

**PROTECTION
LITERALLY
EVERYWHERE**

LEARN MORE

Smart HUB Plus LV

Smart controller of the BE WAVE system.
This device integrates automation and protection
functions to ensure comfort and safety.

Smart HUB Plus LV
is tailored to operate
in low-voltage systems

 **9-28**
V DC

- ✓ Campers, trailers, yachts — monitoring safety and environmental conditions.
- ✓ Delivery vans, trucks and other commercial vehicles — cargo and driver protection

- ✓ Off-grid facilities and RES — independence from the power grid
- ✓ Houses and other facilities under construction — equipment and material protection

Low voltage, high possibilities

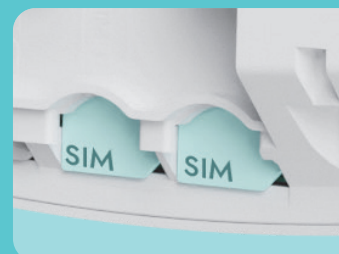

Smart power management

- Protection of the battery against over-discharging
- Automatic switching to the built-in backup power supply
- Checking current voltage and displaying information in the application
- Configurable power supply protection level in the application

Safe and fast communication

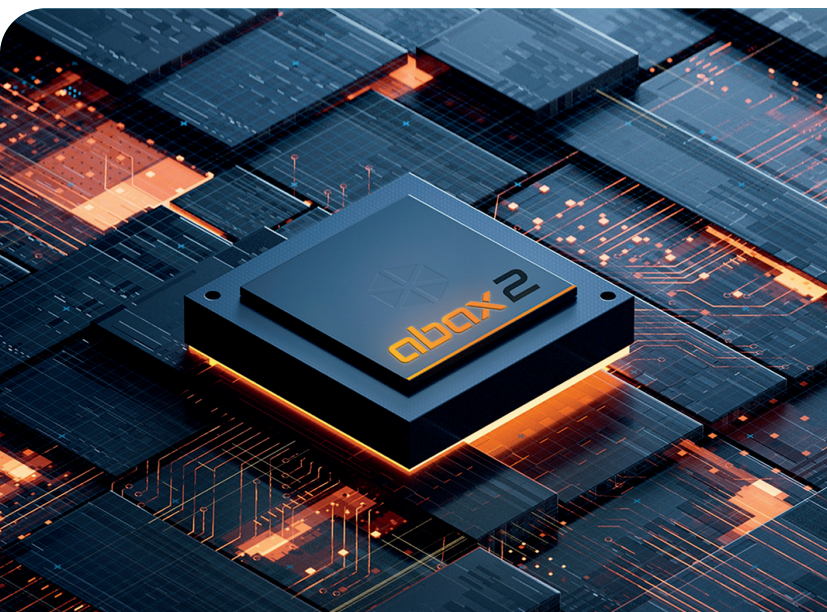

- Stable connection between the HUB and other system devices at a distance up to 2000 m in open terrain
- Built-in GSM LTE, Wi-Fi, and LAN modules ensure reliable information transfer
- Advanced communication encryption according to the AES-128 standard
- Automatic switching between mobile networks

2 SIM cards for even greater security

Even if one mobile network operator fails, Smart HUB Plus LV will automatically switch to another SIM card to ensure a continuous flow of information between the system, you and the security agency*.

**adequate configuration required*

FAST, SAFE, ENERGY EFFICIENT

Driven by the **ABAX 2** technology

ABAX 2 is a state-of-the-art radio-communication technology recognised by industry specialists, ensuring a fast and safe connection between BE WAVE system devices.

Owing to the energy-saving features, devices employed in the BE WAVE system can operate continuously on a single battery for up to 8 years.

Full control in the **BE WAVE** app

Remote control and monitoring from anywhere

Instant danger notification*: burglary, fire, smoke, flooding, CO leak

Easy configuration and customizable settings

**Purchase and installation of additional BE WAVE devices required*

100% FREE

Good reasons for selecting Smart HUB **Plus LV**

Protection (Grade 2) and automation within a single system

Convenient installation followed by simple start-up and everyday management

Flexible choice of power sources, including batteries, generators and RES systems

Fast and reliable notification of detected events

Modular structure — new functions and devices can be added at any time

Designed to protect places without access to the power grid

Operates in low-voltage systems (9–28 V DC)

Connects using LAN, Wi-Fi, and 2G/4G Dual SIM

Features a built-in backup battery

Full control using the BE WAVE app
