

INTEGRA 128-WRL Firmware

It is necessary to use the **FLASHX** program version corresponding to the firmware version being updated.

CAUTION: before downloading program files it is advisable to check the website for updates to the firmware and take eventual measures to assure the control panel's proper operation.

The latest version of **DLOADX** program is required for operation with the current version of the INTEGRA control panel firmware.

INTEGRA 128-WRL control panel with installed firmware version 1.12 dated 20/12/2013 or newer supports ABAX devices (detectors and sirens) with firmware version 5.00.
