

PERFECTA-RF

The **PERFECTA-RF module** is an optional component for **PERFECTA** series control panels* and is used to expand the alarm system with **MICRA** wireless devices. It also allows users to control the alarm system using MICRA keyfobs.

- installed directly in the communication slot on the PERFECTA control panel mainboard
- supports MICRA system wireless devices
- encrypted radio communication in the 433 MHz frequency band:
 - two-way – with wireless keypads and sirens
 - one-way – with detectors and keyfobs
- up to 6 control functions available via Keyfob

* except for PERFECTA-T 32-WRL
