WZ-110

The **WZ–110** indicator LEDs are flashing when a detector or a group of detectors (at least one detector in the group) reports alarm. The indicator is designed for operation within conventional or addressable fire alarm systems.

- optical signalling with LEDs
- power supply from the detector to which the indicator is connected

Enclosure dimensions	84 x 84 x 30 mm
Operating temperature range	-10°C...+55°C
Weight	56 g
Maximum humidity	93±3%
Average current draw (from the detector)	400 µA
IP code	IP 3X
Power supply voltage	10...24 V DC
